**24-hours a day, 365-days a year,  
we improve your safety and quality of living**

**kt telecop leads the popularization  
of security services in the domestic  
market**

Combining the words “Tele” meaning “far, distant” and “Cop”, Telecop offers unmanned security services using communication network. Since its business operation started in 1998, kt telecop has grown into a leading security service provider with more than 300,000 clients nationwide thanks to its cutting-edge IT infrastructure and technical innovation.

**Total security solution with the  
highest priority in safety and quality**

At kt telecop, we promise the highest level of service and reliability in every aspect of safety and security in your lives.

▲ Olleh CCTV Telecop

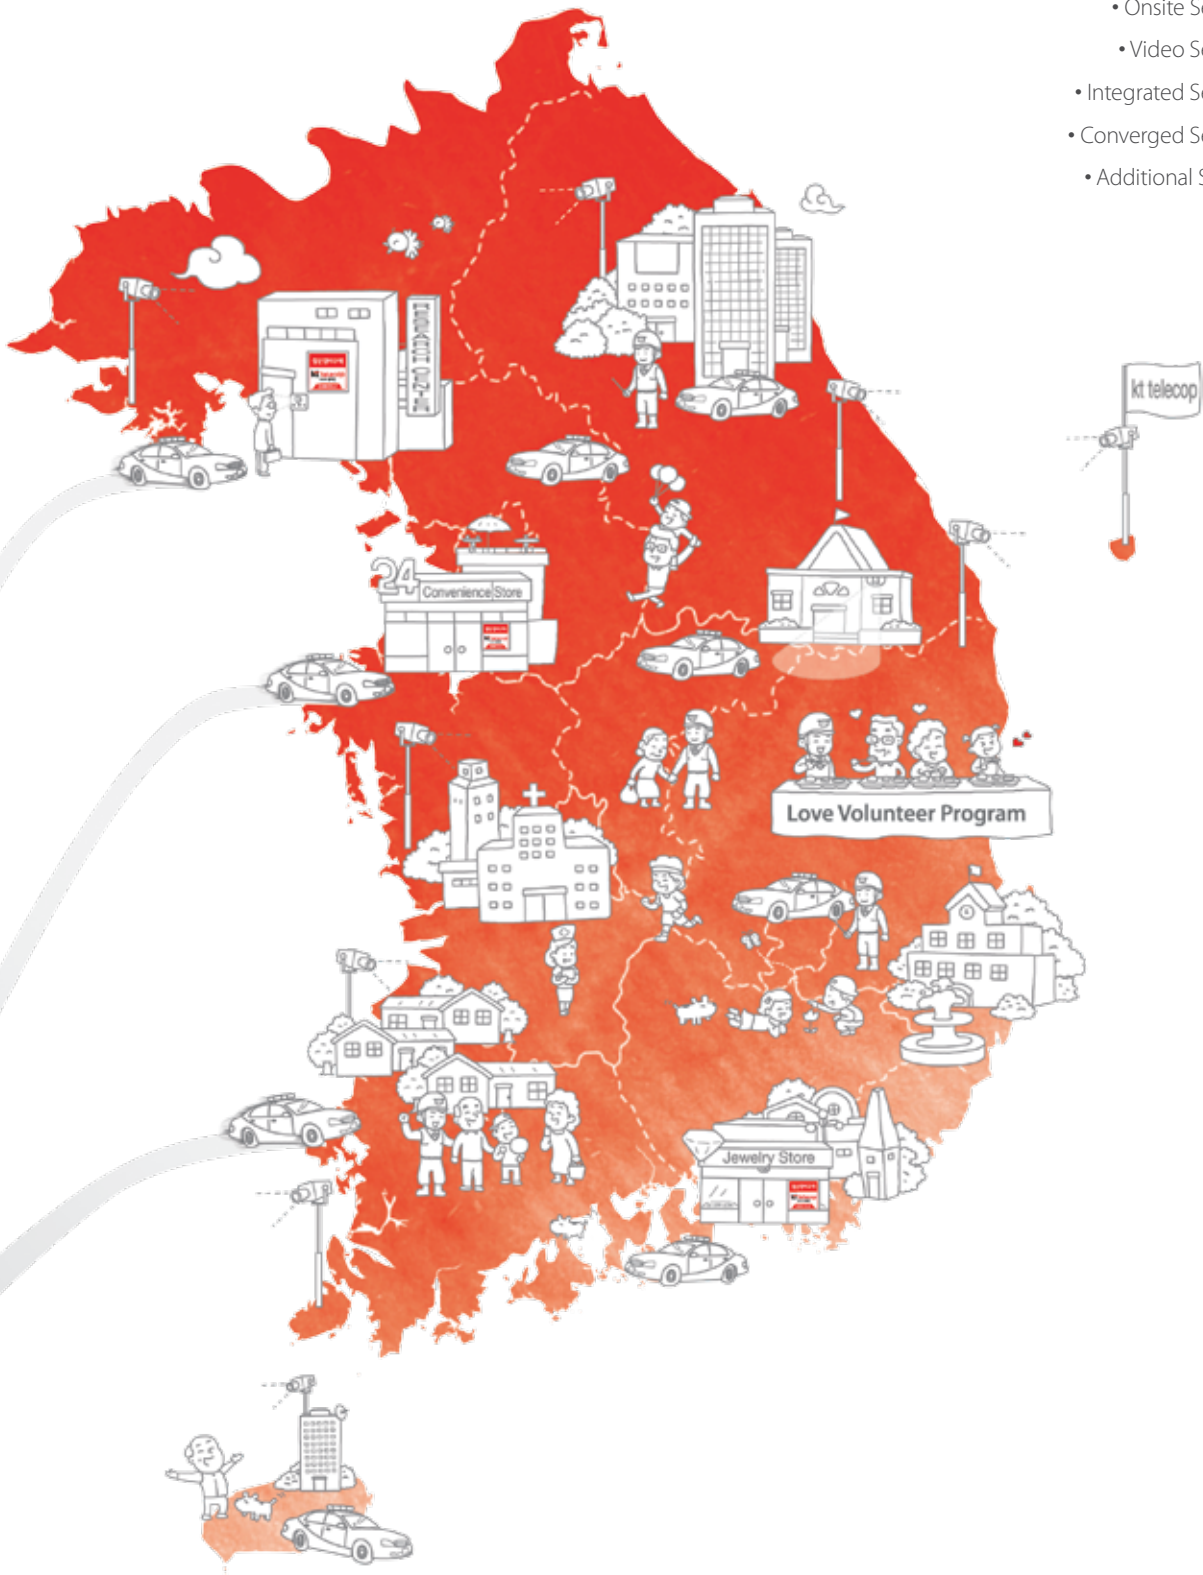

# 24-hours a day, 365-days a year, kt telecop makes the world a safer place.

By incorporating the cutting-edge information communication technologies of kt group into the security business, we introduced the industry's first video surveillance service for smartphone users and cloud service as well as an innovative building management system that combines security, energy and protection service into a single solution. In addition, we are developing next-generation technologies that enable intelligence-based video analysis and biometric recognition and creating more value for our clients.

## kt telecop Service Portfolio

- Onsite Security
- Video Security
- Integrated Security
- Converged Security
- Additional Service

# Onsite Security Service

With our fully customized service and cutting-edge system, we protect you from a wide variety of security threats and risks.

## Highly Recommended To:

- Clients who require 24-hour response and compensation service
- Clients on a low budget for security service
- Residential facilities, stores, offices and warehouses

## | Benefits & Advantages

### 01 Customizable Security Service

Whether it is a store, office, building or factory, we identify potential risks based on the environment and establish security measures tailored to your needs.

### 02 Cutting-edge Security System

Our intelligent video surveillance system and biometric recognition technology ensures the complete safety of your properties.

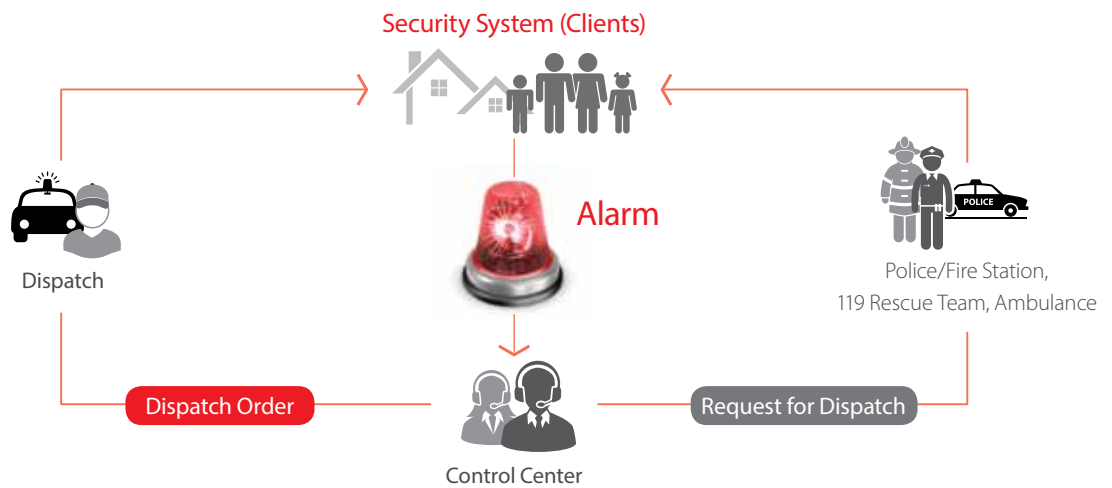

### 03 Speedy Response

Our dedicated team of field agents and controllers respond to emergency situations such as intrusion in a timely and professional manner to minimize the impact.

### 04 Reliable Compensation System

We offer a reliable post-compensation system in response to various accidents to ensure the complete safety and security of our clients.

## Service Contents

# Video Security Service

With full-HD cameras and cutting-edge security system, our video security service is smarter than ever.

## Highly Recommended To:

- Clients who are concerned about the security of their stores
- Clients who need video surveillance through HD CCTV
- Clients operating small or medium-sized facilities

## | Benefits & Advantages

### 01 HD Video Quality

With full-HD IP cameras, we offer 3-5 times better video quality than analog cameras.

### 02 Easy to View

Our system delivers a seamless video streaming directly to your smartphone or PC and records for later viewing allowing you to monitor your properties at anytime, from anywhere.

### 03 Secure Storage of Video

Recorded videos can be stored on your personal cloud account as a more secure storage option.

### 04 Dispatch Security Service

Unlike other CCTV service that is mainly for video surveillance purposes, you can choose to integrate our onsite security service.

Service Option		Recommended To	
olleh CCTV telecop	OCT Guard (incl. Dispatch Service)	DVR	Clients who require video surveillance and dispatch/compensation service.
		NVR	Clients who require a high level of security and HD video surveillance for evidence.
	OCT View (Dispatch Optional)	DVR	Clients with a low budget who require video surveillance.
		NVR	Clients with franchise stores and a large number of facilities.

# Integrated Security Service

Our integrated security system ensures a high level of security for buildings, banks, factories, schools and public offices.

## Highly Recommended To:

- Large-sized places such as buildings, banks, factories, schools and public offices
- Clients who require a high level of security and integrated solutions
- Clients who need to customize their security service

Access Control System

Command & d Control Center

Bank Security

Parking Management System

## | Benefits & Advantages

### 01 Large-scale Security Service

Whether it is for large buildings, public offices, schools or banks, we offer a wide variety of security solutions tailored to your needs.

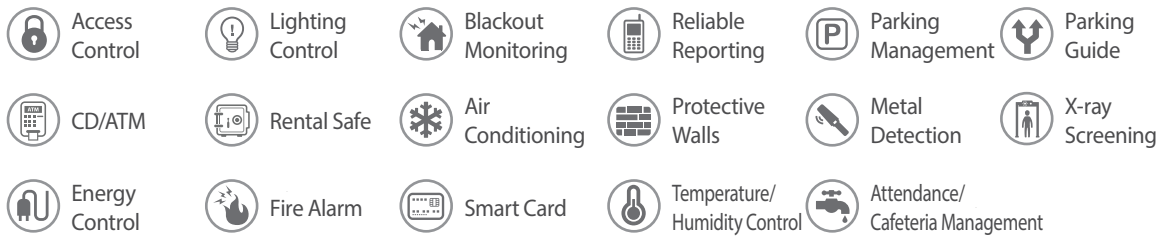

### 02 One Stop Security, Energy and Protection Service

In addition to security and protection service, we offer access control, attendance management, Cafeteria Management and parking management as well as automatic air conditioning, power supply and lighting facilities, making sure your workplace is managed more efficiently.

### 03 Innovation for Safety & Efficiency

Our integrated management and operation system helps you manage your buildings and assets more efficiently and safely.

#### Service Contents

# Converged Security Service

Our innovative solution combines next-generation technologies and cutting-edge network service for the highest level of security.

## Highly Recommended To:

- Clients who require state-of-the-art solutions such as biometric recognition
- Places with high traffic that require power management such as universities and public offices
- Clients who want to safeguard their information using mobile devices

## | Benefits & Advantages

### 01 Biometric Recognition

We offer a biometric identification system based on such personally identifiable features as iris and face to further enhance security measures.

### 02 Energy Management

By controlling lighting and air conditioning systems automatically, we help you save energy and significantly lower your costs.

### 03 Mobile Solution

Our integrated security solution enables access control and information security systems using mobile devices for more efficient security control.

### 04 Perimeter Intrusion Defection System

With electronic fences and CCTV, we make sure that your facilities are secure against intrusion from outsiders.

## Service Contents

- Putting the highest priority in the safety of clients and improving the quality of living

# Social Responsibility

At kt telecop, we help those less fortunate in our society as part of our social responsibility programs.

## 01 Love Volunteer Program That Every Employee Joins

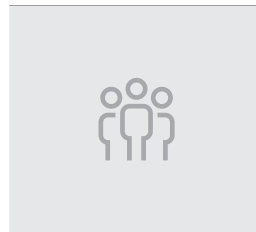

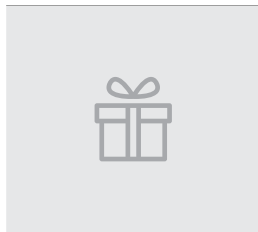

Since 2011, we have been actively engaged in our nationwide volunteer programs where more than 2,000 employees volunteer to give something back to our society.

## 02 Helping and Sharing with Those Less Fortunate

As part of the local community, we organize various volunteer programs to help children, senior citizens, people with disabilities and rural communities.

## 03 Your Partner Who is Making the World a Better Place

We promise to continue our efforts and take initiatives to ensure mutual growth with local communities and a sustainable future.

### Help Children Realize Their Dreams

We form a partnership with local childcare centers to help children from low-income families through cultural and sporting activities.

### Volunteer to Support Senior Citizens

We make determined efforts to provide financial support to senior citizens living alone including a free catering service and donations during winter.

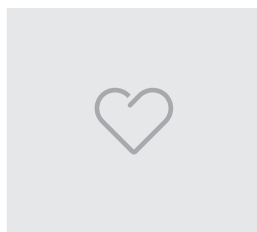

### Mutual Growth with Rural Communities

We extend our volunteer efforts to rural communities offering a helping hand and organizing a direct selling market.

### Help Neglected Members of Our Society

We help neglected members of our society with their independence and rehabilitation by offering a free catering service and supporting disability rehabilitation facilities.
